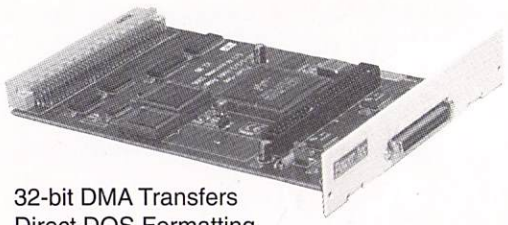
Shouldn't your Acorn computer have the power to perform ?

think about it

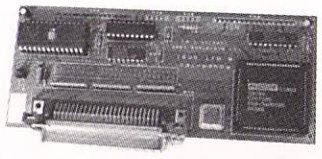
Power-tec Fast SCSI II



32-bit DMA Transfers
Direct DOS Formatting
Create **16 GB** partitions with RISC OS 3.6/3.7

Optimised for the RiscPC, the Power-tec SCSI II interface is fully compatible with: Zip Drives, Jaz Drives, Mag Optical Drives, PD (proteus) Drives, All Syquest Drives and Nomai Drives, as well as ALL sizes of ALL the leading manufacturers' hard discs such as Fujitsu, IBM, Conner, Quantum, Micropolis and Seagate. Also includes ATAPI drivers and SCSI CD drivers for Toshiba, Aiwa, Pioneer, NEC, Plextor, Sony, Sanyo & recordables too! Supports scanners from Epson, Canon, Umax, Mustek, Microtek and many other leading brands. The card is StrongARM compatible, multi-threading, and multi-tasking, with low level format and verify options, and passwording. PLUS - Backup Software, 8 drive icons on the icon bar, drive spindown, configurable LFAU, 16GB Partitions etc... etc ...

8 bit and 16 bit SCSI I also available for **A3000**, **A3010** and **A4000**



Power-tec PowerROM

If you have an old SCSI Card from any of these manufacturers:

Cumana • Castle Technology • Morley Lingenuity • Acorn • Vti • HCCS • Oak

and want to keep it with its existing features but make it StrongARM compatible and have all those other benefits that Power-tec SCSI Card users enjoy, then you need a

PowerROM™

You will get the FULL SCSI II command set with all the functionality and compatibility of the Power-tec SCSI II card (except fast SCSI transfers) when you fit a PowerROM upgrade. Simply replace the existing EPROM on your SCSI card with the PowerROM and run the !PowerMgr application.

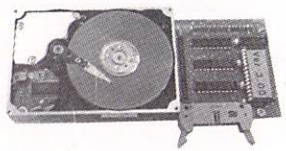
YOU DON'T EVEN NEED TO REFORMAT!

Fitting Instructions, Software Suite (!PowerMgr, !Speed, !BackUp, CD Support & Passwording) and 30 Day Technical Support are all included.

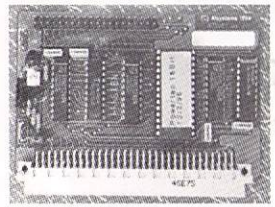
No reduction in the performance of your present ROM.

Power-tec IDE Interfaces

For owners of the **A3000** or **A3010** computers, this Power-tec interface allows users to benefit from the addition of an IDE Hard Drive.



Designed for the older **A300** and **A400** series of Acorn computers, this IDE interface is easily fitted either direct to the PCB or onto an existing back plane and allows the computer to access any size IDE Drive.



Power-tec ATAPI Driver

The Power-tec driver is optimised for higher speed IDE ATAPI CD ROM drives and Jukebox multichangers.

Power-tec EADFS

With this EADFS software module you can add a bigger IDE Hard Disc (ie 1GB or larger) to a RISC OS 3.5 RiscPC.

- Multiple 512 MB partitions possible
- Read/Write Access Parameters
- Passwording
